To: BAUER Spezialtiefbau GmbH
The Director of Africa Division
Mr. Mikko Gastager

From : CWE Bagatelle Dam Project
The Project Manager, Mr. Wang Peng

Date: 30 June 2015

Contract: Bagatelle Dam, Contract No.: MEPU/WRU/BAG/CW/10/12

Subject: Bagatelle Dam Project- Cut Off Wall works

Attention: Mr. Mikko Gastager

Following the successful completion of Bauer's portion of the project, we would like to express our appreciation for the way in which Bauer has performed on the project.

Once on site, the professional way in which the Bauer site team went about setting up the work site was very well received. The process of how the trial mixes and material compositions were conducted in cooperation with our team and the Engineer proved the in-depth expertise of Bauer.

The encountered very hard rock conditions found in the perimeter of the cut-off wall were approached in a very professional way by adjusting the construction method and implementing acceleration measures.

The fact that the work was completed within the schedule speaks for itself in this business.

The quality of the work was first class and accepted by the Engineer. When there were issues, the site team was very proactive in seeking a solution and correcting the problem. After uncovering the complete top of cut-off wall our physical inspection reinforced the test results, confirming that you have delivered a high quality product.

Best regards

Wang Peng
Project Manager of Bagatelle Dam of CWE
